Brought to you by The Spicewood Astronomy Club #3  
Spicewood, TX USA, Earth, Sol System, Milky Way Galaxy

7 of the 8 planets in our solar system will be visible.  
Venus, Earth (just look down), Mars, Jupiter, Saturn, Neptune, and Uranus  
Not all will be visible to the naked eye, but they will be there.  
This visibility lasts from 6:50PM to 09:08PM when Saturn sets below the horizon.  
This event occurs over several days with this time and date selected as a representative.
